# WHO WE ARE

AMG was established in 1994 by visionary leaders Ashraf Awad, Ehab Awad, and Nadia Habib, Ava Mina Group has emerged as a formidable presence, commanding a prominent position across diverse industries. With a rich and dynamic portfolio, the group has consistently demonstrated its leadership in sectors such as real estate, manufacturing, and agriculture. Over the years, Ava Mina Group has been at the forefront of innovation and growth, consistently delivering excellence in each of its ventures. By fostering a culture of strategic expansion and embracing emerging opportunities, the group has successfully diversified its operations, leveraging its expertise to create a lasting impact in multiple sectors. With a strong commitment to quality, integrity, and sustainable practices, Ava Mina Group continues to set new benchmarks of success, solidifying its position as a trailblazer in the business landscape.

## HOUSING CONTRACTING

In the real estate sector, Ava Mina Group is a leading player in the real estate sector, renowned for its portfolio of meticulously developed projects and iconic towers across Egypt. The group has established dedicated entities, including Ava Mina Olive Tree Real Estate Development and B.F.B Real Estate Development, solidifying its commitment to excellence and innovation. With meticulous planning and architectural finesse, Ava Mina Group continues to shape the real estate landscape, setting new standards for luxury and sustainability.

## MANUFACTURING INDUSTRY

Kiromarble stands as a distinguished industry leader, renowned for its exceptional manufacturing and export capabilities in the realm of marble and granite. With a rich history dating back to 2000, Kiromarble operates under the esteemed Avamina Group for housing, contracting, and building. Our state-of-the-art factory boasts cutting-edge machinery sourced from Italy, including industry pioneers such as Simec and Gaspari Menotti.

## AGRICULTURE

Furthermore, the group has a significant presence in the agriculture sector through El Maleka & El Amir, which engages in the cultivation of olives, grapes, and production of olive oil sold in the domestic market and exported abroad.

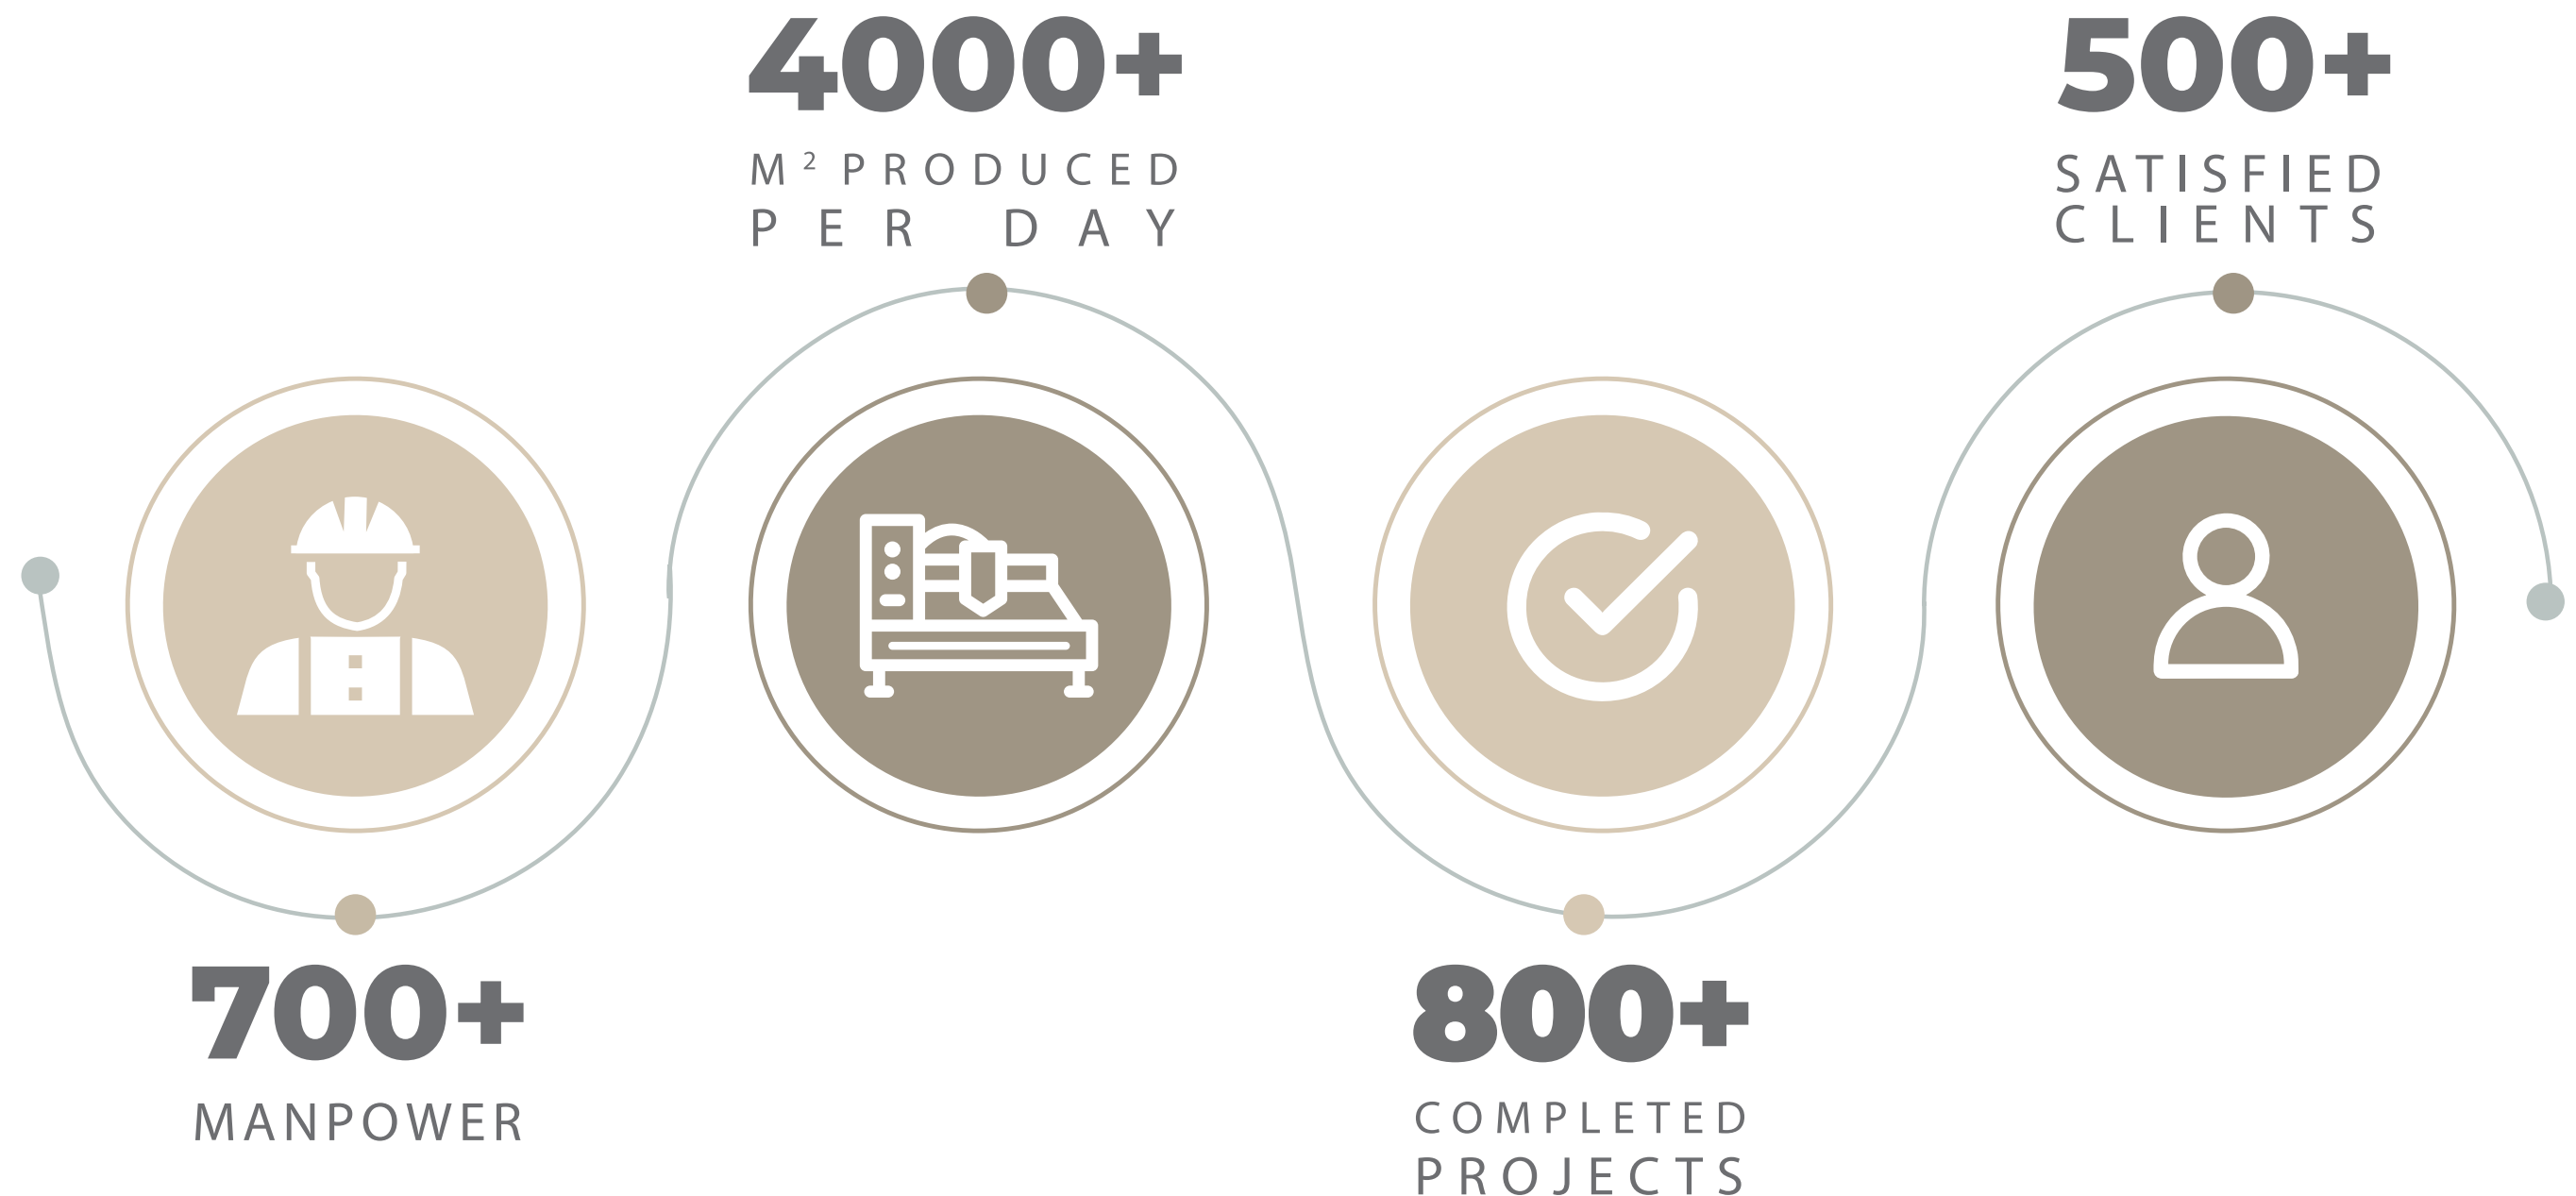

# WHO WE ARE

KIROMARBLE, founded in 2000 in Cairo, Egypt, is a vertically integrated company specialized in quarrying, processing and application of natural stones and surfaces.

With **two factories, three stockyards** and **exclusive quarries in Galala & Sinai**, KIROMARBLE is an established company worldwide, with a strong wholesale and export activity.

**KIROMARBLE is a key player in innovative surfaces...**

As a **prominent manufacturer and exporter** of marble and granite in Egypt, Kiromarble is recognized for its premium quality products. Our state-of-the-art factory in Cairo's Industrial Zone for Marble spans 25,000m<sup>2</sup> indoor and 14,000m<sup>2</sup> outdoor, equipped with advanced machinery from Italy, including Simec and Gaspari Menotti, and the latest technology to ensure superior product quality. **Kiromarble's team consists of Qualified and experienced experts.**

# A FAMILY COMPANY MADE OF PASSION

Our success story has more than 20 years ago when two brothers, Ashraf, and Ehab Awad, founded the company. They invested years of effort to establish an innovative and technologically advanced factory, making it one of the best factories in Egypt's marble and granite industry. Their obsession with maintaining world-class quality resulted in their product meeting global standards aesthetically and technically.

But Kiromarble is more than just a company. It's a **family business that spans two generations**, and our success is a result of our passion and dedication to this craft.

**ASHRAF AWAD**  
CHAIRMAN

**EHAB AWAD**  
VICE PRESIDENT

Our spirit and our passion have remained as strong as they were in the beginning. Today, Kiromarble is recognized as a prominent manufacturer and exporter of marble and granite, offering **premium quality products that meet the highest international standards**.

**MINA AWAD**

**KIROLLOS AWAD**

**MERNA AWAD**

**LAURA AWAD**

# OUR PURPOSE

To produce and provide the international and local markets with the **best quality Egyptian marble and granite**. We aim to exceed our customers expectations by mainiting competitive prices, highly efficient customer service and support, and creating the best working environment to present the best value for all our clients & stockholders.

The Kiromarble factory is established to meet all requirements for marble in the construction industry all over the world. We are looking forward to establish mutually beneficial relationships with all customers worldwide and offer guaranteed material and finish quality as well as direct mail sample for customers' approval. We are using the **latest technology** to ensure the **best quality materials and best export packing conditions**, which qualified us to be one of the biggest exporters for marble and granite in Egypt.

To constantly develop the operations that we have started almost two decades ago. The core of Kiromarble's mentality, is a shared value to not only fulfill our clients' expectations, but to always exceed it.

By expanding locally and globally, we manage to supply the demands of our customers in an unprecedented way. We are able to be efficient and generate solutions due to the accessibility to our factories overseas. Kiromarble's sister companies in the Sharjah and Ajman, UAE allow for **faster production and delivery**.

Our ambition is to develop and expand this successful model. By increasing the locations, Kiromarble is able to knock into more markets and increase its shares while improving the service provided to our clients.

# OUR VISION

# SERVICES & PERFORMANCE EXCEEDING EXPECTATIONS

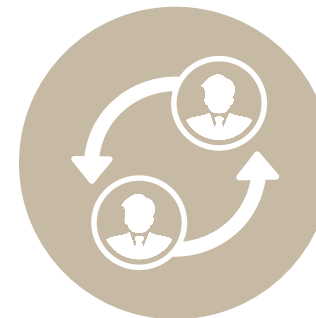

## RESEARCH

Our experienced professionals are constantly in contact with the best quarries in Egypt and overseas to assure the best quality materials for our customers.

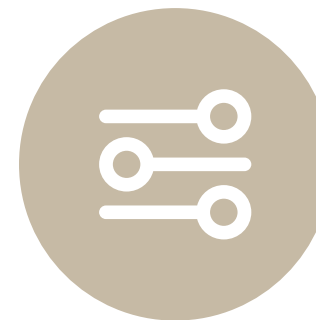

## EXPORT

Our unwavering quality control ensures that our top-quality materials are now a mainstay in the global market. Proudly exporting to major companies worldwide

## CONSULTANCY

Our specialized staff can answer your questions about the special characteristics of our products, while advise you on how to add value to your projects with our products.

## CUSTOMIZATION

Our production department can support any bespoke order, deliver special cuts and orders.

## ENGINEERING

Our team of experienced engineers is well-versed in the latest technologies and best practices, allowing us to offer comprehensive solutions that are tailored to meet the specific needs of our clients.

## — GANG SAWS —

**8 GANG SAWS**  
**16,000 M<sup>2</sup> / MONTH / MACHINE**

Gang saw machines are an essential component of our marble factory's production process, used for cutting large blocks of marble into slabs with precision and efficiency. These advanced machines feature multiple diamond-tipped blades that work together to slice through the marble block in a continuous motion, creating smooth and uniform slabs that require minimal finishing. Our gang saw machines are designed to handle blocks of varying sizes and thicknesses, allowing us to produce slabs that meet the unique needs of our customers. The blades are carefully spaced to minimize waste and increase efficiency, ensuring that we're able to produce high volumes of slabs with maximum precision.

## MACHINERY LIST

# POLISHING LINES

 **5 POLISHING LINES**  
**4000M<sup>2</sup> / DAY / MACHINE**

Our polishing line machine is an essential part of our marble factory's production process. It is specifically designed to bring out the natural beauty of the marble and to create a stunning, high-gloss finish that is sure to impress. Our machine uses a series of progressively finer diamond abrasives to smooth out any imperfections and to bring the surface of the marble to a perfect shine. With the ability to work on large slabs of marble at once, our polishing line machine is highly efficient, ensuring that we are able to produce a high volume of polished marble products quickly and effectively. At the same time, we never compromise on quality, and our skilled technicians carefully monitor the machine's performance to ensure that each and every piece of marble that passes through our factory meets our exacting standards.

# SLAB CUTTING MACHINES

 **10 CUTTING MACHINES**  
**500M<sup>2</sup> / DAY / MACHINE**

We use a range of advanced machines for cutting slabs with precision and accuracy. Our slab cutting machines are specifically designed to handle the unique challenges of cutting large blocks of marble into precise, uniform slabs. We use diamond-tipped blades that are capable of cutting through even the toughest marble with ease, producing clean, smooth cuts that require minimal finishing. These machines are also equipped with advanced laser-guided technology that ensures that every cut is precise, helping to minimize waste and increase efficiency. With our range of slab cutting machines, we're able to produce slabs of varying thicknesses and sizes, ensuring that we can meet the unique needs of our customers, whether they are looking for large slabs for flooring and wall cladding or smaller pieces for countertops and tabletops.

# TUMBLING MACHINES

Our tumbling machine is a versatile tool that is used to give marble a unique, textured finish. By tumbling marble in the machine with a variety of abrasive materials, we are able to create a range of different looks, from a smooth, polished finish to a rough, textured surface. The tumbling process can also be used to soften the edges of the marble, creating a more natural, organic appearance. Our tumbling machine is carefully calibrated to achieve the desired effect for each individual piece of marble, ensuring that we can offer a wide range of finishes to meet the unique needs and preferences of our customers. At the same time, our technicians closely monitor the tumbling process to ensure that every piece of marble that leaves our factory is of the highest quality and meets our exacting standards.

# SPLITTING MACHINES

We use advanced machines for splitting strips, which are designed to handle the unique challenges of creating thin, uniform strips of marble from large blocks. These machines use hydraulic pressure to split the marble block along its natural veins, creating strips that are both beautiful and durable. Our machines are capable of splitting strips of varying widths and thicknesses, depending on the specific needs of our customers. We take great care to ensure that each strip is cut with precision and accuracy, producing a clean and smooth surface that requires minimal finishing. With our range of splitting machines, we're able to produce strips for a wide range of applications, including flooring, wall cladding, and decorative accents.

# LIST OF MACHINERY

## FOR BLOCKS

- 8 **Marble Gang saws** for sawing blocks into slabs  
(Gaspari Menotti , Breton multi blade Blade BM, SIMEC)
- 3 **Mono blades** for squaring blocks and cutting thick pieces  
(BM, Pellegrini)

## FOR SLABS

- 5 **Polishing lines** for slabs  
(Gaspari Menotti, SIMEC, MTS Proton)

## FOR TILES

- 10 **Cutting machines** to cut slabs into cut to size tiles  
(Gaspari Menotti, SIMEC, MTS Proton)
- 3 **Tumbling machines**  
(Kromas)
- 6 **Machines for splitting strips**  
(STONEKS Italian, Tukish Dig Alpi)
- 2 **Waterjet machines**  
(KMT, Waterjet Italiano)
- 1 **CNC router**

## FOR GENERAL FACTORY USE

- 6 **Gantry Cranes**  
(Michielotto, FAEDO)
- 6 **Overhead Cranes**
- 10 **Mobile cranes**
- 4 **Trucks**
- 3 **Water Treatment plant**
- 4 **Forklifts**  
(Komatsu, MTS)
- 3 **Air compressors**

## FOR QUARRIES

- 2 **Loaders**
- 3 **Excavators**
- 4 **Dimond Wire machine** (Benetti)
- 3 **Generators**
- 2 **Big trucks**

MACHINE TYPE	NUMBER OF MACHINES	PRODUCTION PER MACHINE	TOTAL PRODUCTION
GANG SAWS	8	16,000 m² / month 1,536,000 m² / year	128,000 m² / month 12,288,000 m² / year
POLISHING LINES	5	4,000 m² / day	20,000 m² / day
CUTTING MACHINES	10	500 m² / day	5,000 m² / day

## UNEARTHING TIMELESS BEAUTY WITH EVERY CUT

Egyptian marble quarries are among the most highly regarded in the world, known for producing some of the **finest quality marble available**. From the prized Galala and Sinai pearl to the striking Rosso Lepanto and Sunny Gold, Egyptian marble comes in a **range of colors and patterns** that make it highly sought after for a variety of applications. The country's quarries are equipped with advanced technology and machinery to ensure that only the highest quality materials are extracted and processed. Egyptian marble is prized for its durability, resistance to weathering, and unique character, with each piece displaying its distinct patterns and color variations. The marble quarries of Egypt have been a source of pride for the country for thousands of years, and continue to be a **major contributor to the global stone industry today**.

## THE QUARRIES

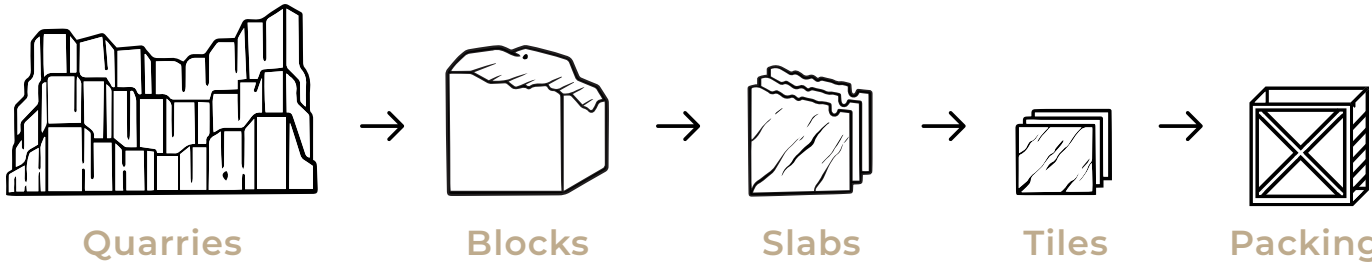

# THE MATERIALS

# MARBLE

The process of transforming stone from quarries into cut-to-size slabs involves several steps that require **precision and expertise**. Quarrying is the first step, where the stone is extracted from the earth using specialized equipment. The blocks of stone are then cut into large, uniform slabs using large saws. Depending on the type of stone, treatment may be applied to improve its **strength and durability**. Next, the slabs undergo surface finishing through a series of machines to achieve the desired finish. Quality control is conducted to ensure that the slabs meet the required standards for size, thickness, and appearance. Once the slabs are finished, they are cut into the desired sizes and shapes using specialized machinery. Finally, the cut-to-size pieces are finished with a final surface treatment before being packaged and shipped to their final destination. Each step of the process requires specialized knowledge and equipment, resulting in a **high-quality end product**.

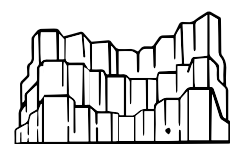

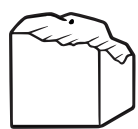

# GALALA

**Galala** Marble is a luxurious and timeless Egyptian marble known for its unique blend of creamy beige and light grey tones. Quarried in the Sinai Peninsula, Galala Marble is a high-quality and durable natural stone that has been used for centuries in prestigious architectural projects around the world.
